

BEST PRACTICES FOR THE SUCCESSFUL REHABILITATION OF AN AMPUTEE

Continuing Education Contact Hours: 4.0

Calling all OTs, OTAs, PTs, PTAs, nurses and other healthcare professionals who work with or care for prosthetic patients. Join us for this educational event sure to leave you with the knowledge and resources to better care for your patients.

COURSE SUMMARY

This course will introduce you to immediate postoperative care, advancements in technology, the importance of a multidisciplinary approach, and the benefits of patient advocates. At the conclusion of the course, participants will have a thorough understanding of the multidisciplinary approach to amputee rehabilitation including postoperative care, componentry selection of technology, and ways in which a peer mentor can help to improve outcomes.

Topics Covered:

- Immediate postoperative care for the amputee
- Advancements in technology
- Importance of a multi-disciplinary approach
 - Outcomes measurement tools
- The role of the patient advocate

COURSE INSTRUCTORS

Matthew Luetke, CPO and Tim Miller, CPO
