

EmpoweredCare is a six-stage framework designed to optimize outcomes for patients with lower limb amputation.

By focusing on mobility and well-being throughout the entire rehabilitation pathway, EmpoweredCare delivers an evidence-based, best-practice approach to interdisciplinary care, support, education, and resources from pre-amputation through life-long care.

An Evidence-Based Approach to Amputation Rehabilitation

With the focus in healthcare changing from episodic, reactive care to long-term health, there is also a shift in how we care for patients after amputation. The Hanger Institute for Clinical Research & Education® has built a body of evidence supporting this approach and is subsequently transforming the clinical care we provide to patients following amputation.

Focused on Delivering Health Systems:

VALUE-BASED CARE

We provide your hospital with an accountable, compliant, cost-effective partnership by working collaboratively to optimize care and resources.

NATIONAL RESOURCES & EXPERTISE

With over 900 clinics across the country, we serve more hospitals with more resources than any other O&P provider and can care for patients close to home and while traveling.

WHOLE-PERSON, LIFE-LONG CARE

In addition to ongoing care, we provide patients with peer support, resources, and education from pre-amputation to rehabilitation and beyond.

PATIENT RETENTION

Our program is designed to retain patients within your health system so they can achieve proper rehab therapy, counseling, and the best possible outcomes.

EmpoweredCare

COMPONENTS

Patient & Caregiver Education

Prior to and/or after surgery, patients and their caregivers will receive education on what to expect after the procedure, including recovery, rehabilitation, community support, and prosthetic options.

Amputee Care Framework

The program provides a customizable, evidence-based amputee care framework designed to take the patient from when they're identified as a surgical candidate through prosthetic follow-up.

Hanger Clinic Team Support

Standardized and specialized training and continuing education based on best practices will be provided to all members of the Hanger Clinic team to ensure we are setting patients up for the best outcomes possible.

Hospital Resources

Resources and education for hospital staff will include training and activities to prepare them for implementing a tailored/custom program to fit their unique needs.

Community Support

Community support resources will be provided to address the emotional and psychological needs of patients and their families.
