

USER GUIDE

WHAT TO EXPECT

A 360° video experience with action, hope and encouragement unfolding all around you.

The opportunity to experience the perspectives of people using prosthetic devices for everyday activities.

PRECAUTIONS

13+

Virtual reality is not recommended for children under the age of 13.

Sit down, or have a stabilizer nearby to hold onto (*e.g., the back of a chair*).

Virtual reality can cause sensations of motion sickness and vertigo, especially in new users. Remove the headset at the first sign of sickness, and try to limit your experience to no more than 15 minutes at a time.

Hanger Clinic cannot monitor nor guarantee the user's safety. It is recommended that you adhere to these guidelines for an optimal and safe experience.

1

GET TO KNOW YOUR GOGGLES

2 DOWNLOAD AND LAUNCH APP

Launch the app and follow the onscreen instructions.

3 INSERT YOUR SMARTPHONE

Adjust the phone shelf sliders to fit your smartphone, and place it on the mobile phone shelf. Ensure that the center line of the goggles is aligned with the white line on the app screen.

Note: You may need to remove your phone case.

4 ADJUST HEADBANDS

Adjust the tightness of the headband using the 3 Velcro adjusters to ensure the goggles are snug but not too tight.

5 PUT ON GOGGLES

Once you have the goggles in a comfortable position, focus on the play button to begin your experience.

If needed:

If any image blurriness occurs, you may need to adjust the distance between the lenses using the pupil distance sliders under the goggles.
