

Patient Education & Engagement Programs

At Hanger Clinic, we know the key to our patients' independence isn't just their advanced prosthetic or orthotic devices but care that addresses the whole self: innovative events, peer support and mentorship, strong communities, and more.

AMPOWER PEER SUPPORT

AMPOWER consists of a nationwide network of trained peer mentors who have successfully recovered and rehabilitated following an amputation. Mentors are available to speak face-to-face, over the phone, online, and through e-mail.

BILATERAL ABOVE-KNEE BOOTCAMP

This challenging and rewarding 3-day workshop strengthens the daily activity and abilities of bilateral above-knee limb loss participants, while providing peer support opportunities.

EMPOWERFEST

With opportunities to learn from world-class prosthetists and peers thriving with prosthetic technology, EmpowerFest is a place to discover the power of shared experiences. These upper and lower extremity community-building events are packed with exciting activities and education, with the most rewarding take-away being the connections made with others in the limb loss and limb difference community.

PATIENT EDUCATION CLINICS

These one-on-one consultations give patients the opportunity to learn from nationally-recognized orthotic and prosthetic specialists. They are free of charge and open to anyone who has a concern or challenge regarding their prosthetic or orthotic device. Reach out to your local Hanger Clinic team to learn more.

In addition to our national programs and events, clinics across the nation are engaging with their communities and hosting educational and peer support events.
