COURSE PRESENTER & CREDENTIALS

COURSE SUMMARY

Physical and occupational therapists who encounter amputees in the rehabilitation setting play an important role in laying a solid foundation for the long-term success of their patients. The work they do early-on and throughout the prosthetic rehabilitation journey has the ability to shape their patients' outcomes and positively impact their overall quality of life.

This course will explore the various phases of prosthetic rehabilitation through a patient's experience, including, pre-prosthetic, therapy training principles and post-prosthetic planning for upper and lower limb amputees. This course includes presentations from multiple patient perspectives' and the impact of therapy on their care journey, current research insights into this patient population, and finally, small-group skills training breakouts and patient journey-based interactive sessions.

Target Audience: Physical and Occupational Therapists

Educational Level: Introductory

OBJECTIVES

Upon completion of this program, the participant will be able to:

1. List various successful therapy care plans based on patient profile
2. Comprehend the breadth of research & outcomes associated with improved mobility and quality of life
3. Compare the techniques for immediate and early prosthetic interventions
4. Provide criteria to determine the patient's readiness for prosthetic rehabilitation
5. Identify key components of pre-prosthetic and prosthetic training program
6. Apply principles of comprehensive care to promote quality of life and functional satisfaction of the patient

COURSE OUTLINE

1. Sign In
2. Lecture (180 minutes)
 - The Patient's Journey
