

# Postoperative Care Following Traumatic Amputation

## COURSE SYLLABUS

COURSE DATE

LOCATION

TIME

COURSE PRESENTER & CREDENTIALS

### COURSE SUMMARY

This course will explore resources for peer support and networks available for your trauma patient. This one hour introductory course for PT/PTA, OT/OTA, RN, and Case Managers will discuss the many immediate and early postoperative prosthetic techniques available, with a focus on traumatic amputation. Through understanding various treatment options, as well as their benefits and risks, will allow the most appropriate techniques to be applied to the user. A patient-centered rehabilitation plan is important to ensure the success of patients, and incorporating programs which support the patient through their emotional journey is just as critical.

### OBJECTIVES

- Upon completion of this program, the participant will be able to:
1. Describe the postoperative & early rehabilitation process for lower extremity traumatic amputation
  2. Describe the goals and benefits of postoperative management
  3. Compare the effectiveness of various forms of postoperative prosthetic treatments
  4. Develop a post-op & rehab treatment plan

### COURSE OUTLINE

1. Sign In
2. Pre-test (if required)
3. Lecture (60 minutes)
  - Introduction
  - Postoperative & early rehabilitation process for lower extremity traumatic amputation
  - Goals/benefits of postop management
