COURSE SUMMARY

This one hour introductory level course for PT/PTA, OT/OTA, RN, Case Managers and other health care professionals describes basic pathophysiology of scoliosis and its implications specifically for Adolescent Idiopathic Scoliosis (AIS). The Instructor will review the names and distinguishing functional characteristic of various devices, as well as identify common full-time and night-time orthoses used in the treatment of Adolescent Idiopathic Scoliosis. Specific devices presented are: Milwaukee CTLSO; Boston-type TLSO; Wilmington Orthosis; Hanger's Scoliosis Orthotic System; SpineCor Scoliosis System; Charleston Bending Brace and the Providence System.

OBJECTIVES

- Upon completion of this program, the participant will be able to:
1. Describe basic pathophysiology of adolescent idiopathic scoliosis (AIS) and its implications
 2. Identify common orthoses used in the treatment of scoliosis
 3. Specifically compare: Milwaukee CTLSO; Boston-type TLSO; Wilmington orthosis; ProSpine Scoliosis Orthosis by Hanger Clinic; SpineCor Scoliosis Brace; Charleston Bending Brace; and the Providence System
 4. Differentiate the indications, advantages and disadvantages of the orthoses used for AIS
 5. Value the importance of multidisciplinary team approach in treating AIS
 6. Articulate role of physical and occupational therapy in scoliosis care.

COURSE OUTLINE
